Carbon Reduction Plan – Brillianto

Supplier name: Brillianto (sole trader)
Publication date: 2 November 2026
Reporting year: 2025–26

Commitment to achieving Net Zero

Brillianto's carbon footprint is already very close to zero emissions (without any carbon offsetting).

Brillianto is committed to achieving net zero greenhouse gas emissions by 2030 in the UK.

Baseline emissions footprint

Baseline year: 2025–26

Emissions	Total (tCO_2e)
Scope 1	0.0
Scope 2	0.0
Scope 3 (included sources)	0.2
Total	**0.2**

Note: As a sole trader, Brillianto's operational footprint is limited to business travel, home office energy, and minimal waste. Scope 1 and 2 are negligible; the 0.2 tCO_2e figure represents the total estimated annual footprint across all relevant sources.

Current emissions reporting

Reporting year: 2025–26
Total emissions: 0.2 tCO_2e

Emissions reduction targets

Brillianto's footprint is already exceptionally low. The target is to maintain emissions at or below 0.2 tCO_2e annually while continuing to operate, and to reduce where practicable through the measures below. The long-term commitment remains net zero by 2030.

Brillianto

Carbon reduction projects

Completed / in place:

- Home-based working with no daily commute.
- Minimal business travel, prioritising remote delivery; travel by bike or public transport wherever possible
- Energy-efficient equipment and lighting.
- Paperless working practices.
- Minimum purchase of products and services, focussing on repair and extension of life of computer hardware.
- The Office is based in a residential building that has solar panels, leading to zero-carbon electricity use during office hours for most days of the year. Electricity supply from the grid is 100% renewables.

Future initiatives:

- Continue to avoid unnecessary travel and consolidate any required journeys.
- Maintain annual footprint monitoring to ensure emissions remain within the current low baseline.

Wider environmental impact (not claimed as an offset)

Through pro bono work for the charity My Zero Carbon, founded by Brillianto, annual monitoring and evaluation reports indicate that survey respondents among the charity's social media audience have reported taking climate actions equivalent to an estimated **100 tCO_2e of avoided emissions**. This is an estimate of influence and advocacy impact. It is **not** claimed as a carbon offset and is not deducted from Brillianto's reported footprint.

Declaration and sign-off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and the associated Technical Standard. It has been approved by the sole trader and will be reviewed and updated annually.

Signed:

Ingo Schüder

Additional details relating to the baseline emissions calculations:

As a home-based sole trader, Brillianto's organisational boundary has been defined to include only emissions directly attributable to business operations. The footprint includes:

- **Business travel** (Scope 3, Category 6).
- **Purchased goods and services** (Scope 3, Category 1), primarily software and occasional hardware.
- **Homeworking energy** (Scope 3, Category 7). This is calculated on a pro-rata basis to reflect the **additional** energy consumed by business activity only. Electricity is estimated based on hours worked and the power rating of office equipment. Heating is apportioned based on the proportion of heated rooms used for business (1 of 6 rooms).
  Private, non-business activities and the baseline domestic energy consumption of the household are excluded from this boundary.
